

1. The UK's biggest butterfly that can only be found in the Norfolk Broads.

Answer: _____

2. A ghostly creature of the night which will sometimes hunt by day. Soft feathers, amazing sense of hearing. It feeds on mice and voles.

Answer: _____

3. One of the first butterflies to emerge in spring. It overwinters as an adult tucked away in ivy leaves. Named after the yellow colour of the wings.

Answer: _____

4. Another butterfly that overwinters as an adult in cool, dark places and emerges on the first warm days of spring. Named after the bright 'eyes' that look like the feathers of a.....?

Answer: _____

5. A beautiful songster of our woodlands. Mainly a summer migrant but some now overwinter and can be seen at bird tables. Can be confused with marsh and coal tits but it's a warbler.

Answer: _____

6. This raptor (bird of prey) is now the commonest in the UK. It is a big bird that loves soaring on warm air currents. You may see it perched on roadside fence posts (look at the blog on the website to find out what it is)

Answer: _____

7. One of our most colourful birds. It inhabits rivers, lakes and streams where it sits patiently watching for its favourite food – fish.

Answer: _____

8. Another overwintering butterfly which is bright orange in colour with jagged wings shaped like a dead leaf. It is named after the small white mark on its underwing.

Answer: _____

9. This colourful crow sounds like a letter of the alphabet.

Answer: _____

10. The UK's largest bird. Its name suggests it cannot make a noise but it can actually make a variety of sounds.

Answer: _____

11. An excellent fisherman you will find these birds all over the Norfolk Broads and rivers. Look at that red eye!

Answer: _____

12. An iconic Norfolk dragonfly (although it appears in many other places). The green eyes and distinctive yellow triangular mark on the abdomen gives it a scientific name of *Aeshna isosceles*.

Answer: _____
